

SILVER SPONSOR

Aramco innovation solving offshore challenges

By Rebecca Maitland CORRESPONDENT

Saudi Aramco continues to strengthen and expand its offshore oil and gas exploration and production program to meet growing global energy demand. Innovation and collaboration are two approaches the integrated energy and chemicals company takes in many areas to safely de-

liver energy around the world. For example, new offshore transportation models, engineering excellence, and collaborative efforts with global offshore drilling contractors and offshore engineering and construction firms such as Rowan Companies and McDermott International Inc. illustrate

Aramco's continued long-term commitment to its core upstream sector. Also, delivering rig crews and critical

equipment to and from some of the world's largest offshore oil fields is no easy task, yet

Photo courtesy of Saudi Aramco

Fast Crew Supply Vessels are part of Aramco's Sea Bus Service, another major initiative in transforming offshore transportation and logistics services for the company's active offshore exploration and production program.

> Saudi Aramco's active network of offshore fields continue to be serviced safely and efficiently. The company's marine department instituted a Sea Bus Service employing Fast Crew Supply Vessels (FCSVs) instead of conventional crew boats and heli

copters. With significant cost savings, the program uses fewer vessels, thereby reducing the helicopter fleet load and greenhouse gas emissions.

This program began early last year with more than 45,000 passengers safely transported to rigs from the Tanajib Marine Facility, located on the northeast coast of the Arabian Gulf. The company anticipates approximately 55,000 passengers will be transferred each year by the service.

Saudi Aramco's research and development advances will be recognized during OTC with three Meritorious Awards for Engineering Innovation from one of the world's largest energy industry publishers,

With more complex onshore and deeperwater offshore plays driving demand for improved subsurface depth imaging, Aramco's Exploration and Petroleum Engineering Center — Advanced Research Center (EXPEC ARC) has been pushing the limits of seismic resolution advances and data imaging approaches.

"Seismic and EM Joint Inversion for

Accurate Depth Images" was the winning entry in Hart's Exploration Category. Aramco will receive two awards in the Formation Evaluation Category for "3D Mapping of Reservoir Saturation from Crosswell Electromagnetic in Horizontal Wells" and "Multifunctional Nano-Tracers with In-situ

Expanding global relationships, Aramco and McDermott recently signed a memorandum of understanding to create a regional engineering and offshore fabrication hub for offshore structures at the King Salman International Complex for Maritime Industries and Services in Ras Al Khair, Saudi Arabia.

Aramco has also entered into a landmark agreement with Rowan Companies to create a joint venture offshore drilling program to own, operate and manage backup drilling rigs in the Kingdom.

At OTC, visit Saudi Aramco, booth #1861, to learn about company activities, research and development programs, or expatriate career opportunities. www.aramco.jobs.

OTC set to inform, educate May 1-4

By Rebecca Maitland CORRESPONDENT

The 2017 Offshore Technology Conference (OTC), which is set for May 1-4, NRG Park, is one of the largest energy events in the world and one of the most important for the oil and gas industry, featuring more than 2,300 exhibitors and attendees from 100-plus countries.

One of the most important factors about OTC is it's where approximately 100,000 energy

professionals gather to exchange ideas and opinions to advance scientific and technical knowledge for offshore resources and environmental matters.

The week will be filled with special sessions, luncheons, programs, networking, technical sessions, discussions, dinners, receptions, panels and an array of opportunities designed to enrich the industry.

Founded in 1969, OTC's flagship conference is held annually in Houston.

"One of the reasons OTC is held in Houston is because of NRG Park, which is able to accommodate a conference of this magnitude and importance," said Wafik Beydoun, vice chairman of the board at Offshore **Technology Conference** Inc., representing the Society of Exploration Geophysicists, and who is

employed at Total. A few of the technical session highlights this year include Updates on World-Class Projects, Strategies for Adapting to a Lower Priced Environment, and New Developments in Major Offshore

'Safety and risk management will also be highlighted. While

the transition to a lower cost is critical to the industry, safety and environmental responsibility remain the cornerstones of success," he said.

Designing and developing offshore renewable energy, such as

wind, wave and solar energy structures and infrastructure, also will be discussed. "The digital revolu-

tion in on the list, too. We will be looking closely at big data and the growing importance of

cybersecurity," Beydoun said. The list of speakers is also

impressive, with numerous CEOs and other high-ranking executives from global energy companies.

Beyond the program is the opportunity for individual professionals to network with peers in a face-to-face setting.

OTC also keeps a keen eye on the horizon by providing a venue for university students, young professionals and startup companies, all of which is available on the OTC website by clicking Attend, then Special

The OTC 2017 mobile app is designed to enhance attendants' experience. To download, go to http://2017.otcnet.org/Content/ Download-the-OTC-2017-Mobile-App.

Why is OTC a must-attend event?

By Rebecca Maitland

CORRESPONDENT

The Offshore Technology Conference is a need-to-attend event for anyone involved or considering being involved in this industry.

"Companies don't just need customers, they also need information, innovation, discussion and collaboration, and you have to go looking for them. OTC makes the searching easy. It provides for all the fundamental needs of business," said Andrew De Bray, managing director and founder of consulting firm Factum Ltd.

Statoil will be in attendance as well at the event.

"For a technology-based energy company and offshore operator like Statoil, the Offshore Technology Conference is the premiere conference to meet leading energy industry professionals, exchange scientific

knowledge and technical advances in the offshore industry," said Uma Ranganathan, human resources leader, Statoil.

Another company that thinks attending OTC is important is MATRADE.

"For the sixth consecutive year, MA-TRADE, together with the Malaysia Petroleum Resources Corporation, is hosting its Malaysia Pavilion at Booth #9409, located at the Parkway at NRG Park," said Rusiah Mohamed, Consul and Trade Commission, MATRADE, Consulate General of Malaysia.

MATRADE will be promoting Malaysia's oil and gas industry and the products and services offered by 15 participating Malaysian companies.

"These products include pipes, tubes, fittings and flanges; drilling equipment; heat-recovery systems; expansion joints and rubber-molded products; and flare burners and ignition systems," Mohamed said.

Services Malaysian companies offer include health, safety and environmental consulting, freight and logistics, third-party engineering inspection and non-destructive testing, machine shop and repair, pipeline inspection and cleaning, and integrated EandP consulting in the areas of subsurface, surface, and core and fluid studies.

"OTC provides the right platform for industry networking, which is a key business enabler. Second, it provides a global view of the industry. Third, it allows a single qualification point for the plethora of information and disinformation published in this digital age," De Bray said.

The conference often allows for a more up-close-and-personal, unguarded access point to multiple levels of organizations.

"OTC provides a forum to find out the things you did not know you did not know. Many times, in business you don't need

Photo courtesy of OTC

Staff and the Egyptian oil minister gathered during the exhibits at the global Offshore Technology Conference 2016.

affirmation of what you know, you need the discovery of what you don't. OTC gives you that. And that alone is why OTC is a must attend event," De Bray said.

NOTICE TO JOB APPLICANTS Advertisements in these columns are accepted on the premise that jobs offered will be filled on basis of merit without discrimination in employment because of sex unless such discrimination is based on a bona fide occupational qualification for a particular position. Headings under which advertisements are placed must not be considered as an expression of preference, limitation, specification or discrimination based on sex and are to be considered a convenience to inform which positions would ordinarily be of interest to one particular sex because of the work involved. OTC events cover full range of oil and gas interests

By Jennifer Kimrey CORRESPONDENT

he Offshore Technology Conference, the world's foremost event for the development of offshore drilling, exploration, production and environmental protection, is celebrating its 48th year and will be offering attendees a lineup of special events.

"This year, the conference will feature the OTC Distinguished Achievement Awards Luncheon to recognize Achievement Award recipients, raise funds for a worthy cause (Oilfield Helping Hands) and provide an excellent opportunity for industry leaders to network with colleagues from around the world," said Joe Fowler, OTC chairman.

Back by popular demand

for the second year are the one-day training courses organized by its sponsoring societies. Courses include: » Fracpacking for Sand Control,

» Seismic Interpretation in Deep Water Basins,

» The Sustainability Imperative: Making the Case and Driving Change.

"OTC will also host its annual The Next Wave program on Monday, May 1. Designed and organized by young professionals, The Next Wave helps open communication between the generations," he said.

OTC will recognize 17 technologies with the Spotlight on New Technology Award, including awards for two small businesses. The 2017 awards will be presented at 4 p.m. on May

OTC is celebrating its 48th year and will be offering attendees an interesting lineup of special events.

1 at the rotunda in NRG Center.

The Rice Alliance Startup Roundup at OTC will return on Monday,

May 1, as well.

"The showcase event will present 50 emerging energy companies available for investment. It offers a great

opportunity for OTC attendees to learn more about these evolving businesses and enable potential partnerships and investments," Fowler said.

Now in its third year, d5: The Next Big Thing, is scheduled for May 5 and will bring together some of the brightest minds in multiple industries for talks that inspire participants to discover unique connec-

tions and solutions. "In addition to recurring topics, an emphasis is being made on how industry conditions are creating technology breakthroughs; major changes under way in Mexico and Brazil concerning regulation and development of offshore resources; designing and developing offshore renewable energy structures and

infrastructure; big data and the growing importance of cybersecurity; while keeping best safety practices top of mind," Fowler said.

Once a two-hour networking session, the Women in the Industry Sharing Experiences event has been elevated to a half-day program on Wednesday.

"Consistent with its mission to create an inclusive space at OTC, the event includes three sessions where men and women leaders of our industry have opportunities to network and discuss how diversity enhances business performance," Fowler said. "Keynote speakers, panelists and roundtables will focus on the value of a diverse environment, communicating across disciplines, leadership styles and more."
