

Factum Limited

Is recruiting for a:

Project Manager

Factum Limited is a bespoke IT-centric consultancy and advisory company with offices in London and Houston. Its client base ranges from local software providers to global conglomerates.

Since its inception in 2012 Factum has had a solid record of profitable growth. We are proud of our heritage, our progress and our future. With its planned growth, Factum can offer its employees the opportunity to grow both personally and professionally in the fields of technology, advisory, delivery, training or documentation on a global scale.

* * * *

Due to growth in its Trading Systems client portfolio, Factum Limited is looking to expand its team with a capable and forward-thinking *OpenLink Project Manager*.

Factum's client has a global presence in the trading industry and is looking for a project manager who can work seamlessly with their own team and selected 3rd party providers to implement Findur for one of its business units that is based in the mid-West.

Some travel and onsite time is expected, but after having shown your ability to manage the project effectively, you will also be able to work remotely.

In the role, you would be directly responsible for the success of the project. You would be managing a delivery team comprising users, 3rd party delivery organisations, and internal IT teams and functions.

Primary Competences and Aptitudes:

- Practical experience of delivering Endur / Findur implementations and upgrades successfully
- An understanding of the fundamentals of the Endur / Findur software suite
- Good planning and budgeting techniques to establish optimized yet achievable project plans and budgets
- Excellent project management skills to control and manage project progress to time, cost, and quality guidelines
- Experience in project reporting, including R.A.G. status reporting and management summaries
- Good communication skills and flexibility in working effectively with all areas of the organization
- Able to apply good change control and scope management processes
- Effective at managing resourcing and the human resource elements of projects, including team management, leadership, and providing direction and delivery focus
- Understanding of development principles, including Agile and Waterfall approaches
- Knowledge of project risk and issue management

Secondary Competences and Aptitudes:

- Liaising – 3rd party suppliers and vendors
- Logical reasoning – business and systems analysis
- Diligence and accuracy – designing and building optimal solutions
- “All-round thinking” – questioning ambiguity and considering aspects not stated or considered
- Rapid comprehension – quick to understand situations and related factors

- Problem solving – prioritization, assessing variables, and driving action plans
- Time management – working to deadlines and milestones
- Client focused – ensuring the client’s needs are considered and delivered upon

Qualifications:

- *Required* – worked in a similar role for a minimum of 3–5 years
- *Required* – practical understanding of software development lifecycle techniques and the various challenges in each phase
- *Preferred* – previous project management experience with the OpenLink Endur / Findur software suite
- *Nice to have* – Findur-specific experience, including ETC and OTC derivatives trading and associated business processes (credit & risk management, payments processing using SWIFT messaging, and interfacing to SAP S4/HANA)

* * * *

For the successful candidate, Factum will provide a competitive salary and benefits package commensurate with experience.

Factum is successful because it has had a strong team driving it forward since 2012. If you want to be a member of this team and provide technical, consultancy, delivery and advisory solutions to Factum’s clients, please reply to this advert, providing a CV and current salary and remuneration details.
